

# STAGE REQUIREMENTS

## THE JEFF WEST HYPNOSIS SHOW

We need stage space for 22 people

1. Elevated stages must be 24' across x16' deep (*Minimum stage size acceptable is 24' across by 12' deep*)  
If elevated stage cannot meet these min. sizes you must setup on the floor instead... for safety reasons  
Stage should be 1' to 3' feet high for best audience viewing and participation  
Carpeted stage is a definite asset but not required
2. 8' high black back drop or curtain along the back of the stage
3. Make sure stage is setup away from high traffic areas such as main entrance, bar, washrooms or kitchen if possible
4. Comfortable armless, padded chairs are non-negotiable must haves!!! Check with your venue or rent them.  
The more comfortable the chairs ...the better the show will be (smooth back chairs only, **no bare metal** chairs)
5. Lighting the front of the stage is very important so audience can see what's happening, if your venue cannot provide any front stage lights we have specialized front lighting available at only \$175.00 extra. It's worth it if you want to get the most bling for the audience!
6. Room temperature should be 75 degrees or higher as a cool room distracts volunteers from relaxing
